

## DATCON LCD Hourmeters

### Setting new standards

Built to industry standards so you can drop them into your equipment and have years of reliable service. Hourmeters are relatively simple gauges, but using them consistently to track and log maintenance needs can save equipment and vehicle operators expensive and unplanned repairs.

- IP67 sealed front and rear; sealed to 5psi
- Wide operating voltage and temperature range: 7-56VDC; -40°C to 85°C
- “Inhibited” or “non-inhibited” configuration (one solution/part number)
- Facilitate timely service, warranty tracking, resale valuation and rental usage
- Product options include round and rectangular analog and digital LCD and electromechanical hour meters, meter modules, combination volt/hour meters
- Offered in a variety of bezel styles, mounting styles, reset capabilities, voltages, frequencies and colors. Hourmeters can track time to 99,999.9 hours
- Designed to withstand 50G shock/vibration and IP 67 sealing while maintaining high accuracy (+/- 1%)
